

# Industrial Microwave Silica Powder Heating Dryer

## 1. Description Of Industrial Microwave Silica Powder Heating Dryer

As microwave silica powder drying machine manufacturer in order to meet various market demands, our continuous microwave oven is summed by a number of silica powder microwave dryer technical engineers. Loyal a number of silica powder drying machine project technology patents, which can save silica powder microwave dryer costs while improving good development in the silica powder drying manufacturing industry.

Industrial continuous microwave dryer could dry chemical material such as activated carbon, filter carbon, foam EPS, polyester plate curving, synthetical material, EPC and other industrial chemical stuff. Microwave tunnel dryer adopts five-layer heating method, uses electricity, no fuel, no boiler, no pollution, no energy consumption, no heat conduction, uniform heating, fast heating speed, and the moisture content of dry silicon powder is below 35%. The speed can be reduced hundreds of times. When heating, the microwave energy acts directly on the medium molecules and is converted into heat energy. Because the microwave is penetrating, the medium is heated inside and outside at the same time, and there is no heat conduction, so the heating speed is very fast.

#### 4.Functions & Features Of Industrial Industrial Microwave Silica Powder Heating Dryer

NO.	Features of Microwave Chemical Material Dryer
1	Microwave energy uniformly penetrate inside of material. Tunnel microwave dryer or batch oven is able to quickly heat and dry off those chemical material such as silica powder, especially for small particles.
2	Unlike the traditional heating method from external to internal, microwave tunnel dryer directly heat inside of silica powder so the water content could quickly reach under 1% to meet

	with customers's expectation.
3	It also suitable for high tech material supreme drying such as 3D material and other specific requirement of material.
4	Flexible and easy control panel; reliable control system.
5	Continuously heat the material 24/7.
6	Less labor, easy operating , small working place without pollution and noise.
